ROAD DRAINAGE CONSTRUCTION ANNOUNCEMENT

Contract Name: Cherry Road Drainage Improvements
Project Number: H583700
Contract Number: H583702

Dear Residents:

As discussed during our community meeting on June 26, 2024, construction of the storm drainage improvements near Pleasant Plains Road at Cherry Road is scheduled to start on or about July 22, 2024. These improvements include installation of a storm drain inlet and culvert, and will reduce ponding of rainfall runoff at the southern edge of Pleasant Plains Road in this immediate area.

Construction crews will have flaggers directing traffic with an alternating single-lane roadway closure during active construction activities. Construction will occur weekdays, between 8:00 am and 5:00 pm, and is anticipated to last three weeks, weather permitting.

Please contact Robert Fernandez, Engineer Manager at pwfern83@aacounty.org with any questions or concerns.

The Department of Public Works (DPW) appreciates your cooperation in this matter.
