This project is to design, acquire right of ways and construct a force main from the Mayo WRF site to the Annapolis WRF; construct upgrades to the Mayo Influent SPS and the Glebe Heights SPS; and a new force main from Glebe Heights SPS to the Mayo Influent SPS. When completed wastewater will be treated to ENR standards at the Annapolis WRF. The Mayo and Glebe Heights treatment processes will be abandoned and decommissioned.

Project scope is amended to allow rehabilitation of existing plant treatment components to continue reliable operation of plant until MDE permit issues are resolved and construction of new facility is complete.

Benefit

To upgrade the plant to increase operational efficiency and increase capacity to meet planned development demands.

S810700 Mayo Tank Replacement

Project Class:

Wastewater

Description

Dept:

DPW-Utilities

Funds are requested for a multi year replacement program of aging Fiberglass tanks and tank controls and all necessary appurtenances, as well as additional easements to include maintenance of tanks controls and controls connections to tanks in the Mayo SSA.

Benefit

The fiberglass tanks are beyond its normal service life and DPW has recorded deterioration of the tanks during routine and emergency maintenance calls. This project is necessary to comply with the Capacity Management Operation and Maintenance (CMOM) program in an effort to limit the number and size of sanitary sewer overflows.

X738800 Sewer Main Repl/Recon

Project Class:

Wastewater

Dept:

DPW-Utilities

Description

This is a multi year sewer infrastructure investigation, rehabilitation and replacement program to ensure the adequacy of the County's Wastewater Collection System. Numerous complaints of insufficient capacity, basement flooding, stoppages and system interruptions indicate the need to investigate, rehabilitate or replace inadequate mains and service connections. Results of investigations and rehabilitation will require calibration and upgrade of the hydraulic model to accurately reflect system capacity. Additionally, data conversion and automation will be required to graphically display modeled capacity and infrastructure expansion. Studies of the force main network are also included in this project.

Benefit

Improves reliability of operation.

X741200 WW Service Connections

Project Class:

Wastewater

Dept:

DPW-Utilities

Description

This project consists of installing service connections and meters to existing water and sewer mains for which service laterals were not originally constructed as part of the capital budget program. This project is also used for new meter installations. Connections made for water service are installed under project number (X-7424) and connections made for sewer service are installed under project number (X-7412). All services are installed under contracts administered by the Department of Public Works. This project was previously funded by user connection charges. Beginning in FY2004, user connection fees were no longer deposited in the Utility Debt Service Fund and then transferred to this project as a funding source. Instead, these fees are now deposited in the Utility Operating Fund and this project is funded with Utility PayGo.

Benefit

This project will furnish service for in-fill lots as well as permit on-property connections required by court order.
