Even without a prescription, eye exams can help you see and feel your best.

- ✓ An **eye exam can spot early signs of diabetes, high blood pressure, high cholesterol and heart disease.**¹ Not to mention cataracts and glaucoma.
- ✓ The average American spends over 7 hours looking at a screen each day.² All this **exposure can put strain on our eyes** and may be linked to blurred vision, dry eye and headaches.
- ✓ Your eyes are always changing. Our network **doctors can track even the slightest changes** with the latest in digital exam technology and retinal imaging.
- ✓ **UV rays can cause cataracts, macular degeneration, vision loss and eye sunburn.** Even in winter. Sunglasses can easily block 99% of these rays.³

It's estimated that myopia could affect upwards of 52% of the world population by 2050¹.
