

**FINDINGS AND RECOMMENDATION
OFFICE OF PLANNING AND ZONING
ANNE ARUNDEL COUNTY, MARYLAND**

APPLICANT: Gary J. and Tracy Lynn Miciche, Jr.

ASSESSMENT DISTRICT: 3

CASE NUMBER: 2024-0167-V

COUNCIL DISTRICT: 5

HEARING DATE: November 14, 2024

PREPARED BY: Jennifer Lechner
Planner

REQUEST

The applicants are requesting a variance to allow a dwelling addition with less setbacks than required and that does not comply with the designated location of a principal structure on a waterfront lot on property located at 991 Magothy Avenue in Arnold.

LOCATION AND DESCRIPTION OF SITE

The subject site consists of 10,409 square feet of land and is located with 31.5 feet of frontage on the east side of Magothy Avenue. It is identified as Lot 5 of Parcel 49 in Grid 22 on Tax Map 33 in the subdivision of Cedar Point. The waterfront property is zoned R2 - Residential District, is located within the Chesapeake Bay Critical Area LDA - Limited Development Area, and is mapped as a BMA - Buffer Modification Area. The subject property is currently developed with a one and a half story single-family detached dwelling, detached garage, an inground pool, a pier, and other associated facilities.

PROPOSAL

The applicants are proposing to construct a second and third floor addition (42' 6" x 24' 5", with a max height of 30' 4-5/8") over the existing first floor.

REQUESTED VARIANCES

§ 18-2-402(1) of the Code allows for the Office of Planning and Zoning to designate the location of a principal structure on a waterfront lot based on an approximate average of the location of principal structures on abutting lots intended to keep structures relatively in line with one another. The proposed dwelling will not be relatively in line with principal structures on abutting lots, necessitating a variance.

§ 18-4-601 provides that a principal structure in an R2 District be set back a minimum of 7 feet from the side lot line. The proposed addition would be located as close as 6.53 feet from the southern side lot line, necessitating a variance of 1 foot.

FINDINGS

The subject property is generally rectangular in shape and is undersized with regards to the 20,000 square foot minimum area required for lots not served by public sewer, and to the minimum width of 80 feet, for lots in an R2 District. A review of the County aerial photography shows an eclectic mix of dwellings and lots in this waterfront community. The dwellings on either side of the subject property are located farther from the shoreline than the subject dwelling.

The existing critical area lot coverage of the site is 4,796 square feet, which exceeds the lot coverage allowed under § 17-8-402 (31.25% or 3,252.8125 square feet). The reconfiguration of lot coverage will be subject to a 10% reduction in accordance with § 17-8-403 (10% of 1,543.1875 square feet, or 154.31875 square feet)¹. The existing coverage by structures is 2,512 square feet. The proposed post-construction coverage by structures is 2,552 square feet, which is below the 30% (3,122.7 square feet) maximum coverage by structures allowed under § 18-4-601.

Building permit B02414397, to construct an addition, was submitted on January 5, 2023. Variance approval must be obtained prior to the permit being issued.

The applicants' letter explains that due to the size of the site and the location of the existing house, there is no way of building the proposed addition without the need for relief.

Agency Comments

The **Health Department** does not have an approved plan for this project, but has no objection to the variance request as long as a plan is submitted and approved by their Department. Their Office also notes that the site plan for the Perc Application, PAT02050567, must be revised.

The **Critical Area Team** has no objection to this request.

Variance Criteria

For the granting of a zoning variance, a determination must be made as to whether, because of certain unique physical conditions peculiar to or inherent in the particular lot or because of exceptional circumstances other than financial considerations, strict implementation of the Code would result in practical difficulties or an unnecessary hardship.

In this particular case, the property is constrained by the location of the existing dwelling in relation to the dwellings on the abutting lots. In fact, the subject dwelling sits closer to the shoreline than most of the other dwellings along the shoreline. This results in a practical difficulty in redeveloping the subject property.

¹ Per § 17-8-403, Existing impervious surfaces outside the buffer and expanded buffer may be reconfigured if the reconfiguration of lot coverage shall result in a 10% reduction of the amount of impervious surfaces that exceed the maximum permitted lot coverage.

The light, air, and view of the adjacent dwellings are already impacted by the location of the one and a half story subject dwelling. However, the third story of the addition will increase the impact to the abutting properties. The addition, as proposed, seems excessive when the applicants already have reasonable use of their property. Therefore, the granting of the variance will alter the essential character of the neighborhood or district in which the lot is located, substantially impair the appropriate use or development of adjacent property, and may be detrimental to the public welfare.

With mitigation, the requested variance would not reduce forest cover in the limited development area of the critical area, nor be contrary to acceptable clearing and replanting practices required for development in the critical area or a bog protection area.

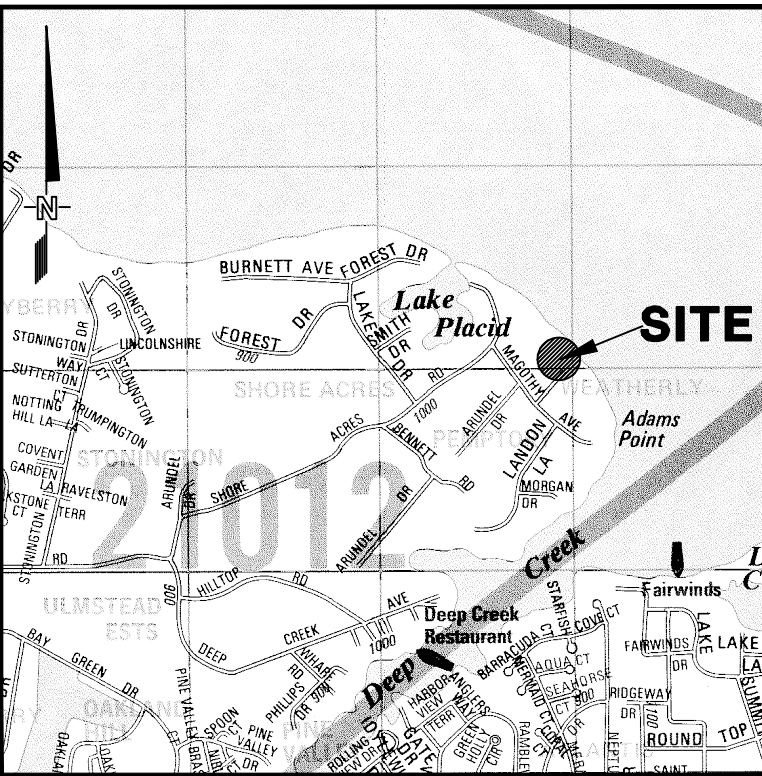

While there is a practical difficulty in redeveloping this property, and this Office does recognize some relief may be warranted for a new second floor addition, a third floor would result in greater impacts to the abutting properties and cannot be supported.

RECOMMENDATION

Based upon the standards set forth in § 18-16-305 of the Code under which a variance may be granted, as proposed, this Office recommends *denial* of a zoning variance to § 18-2-402 to allow a dwelling that does not comply with the designated location of a principal structure, and *denial* of a zoning variance to § 18-4-601 to allow a dwelling addition with less setbacks than required.

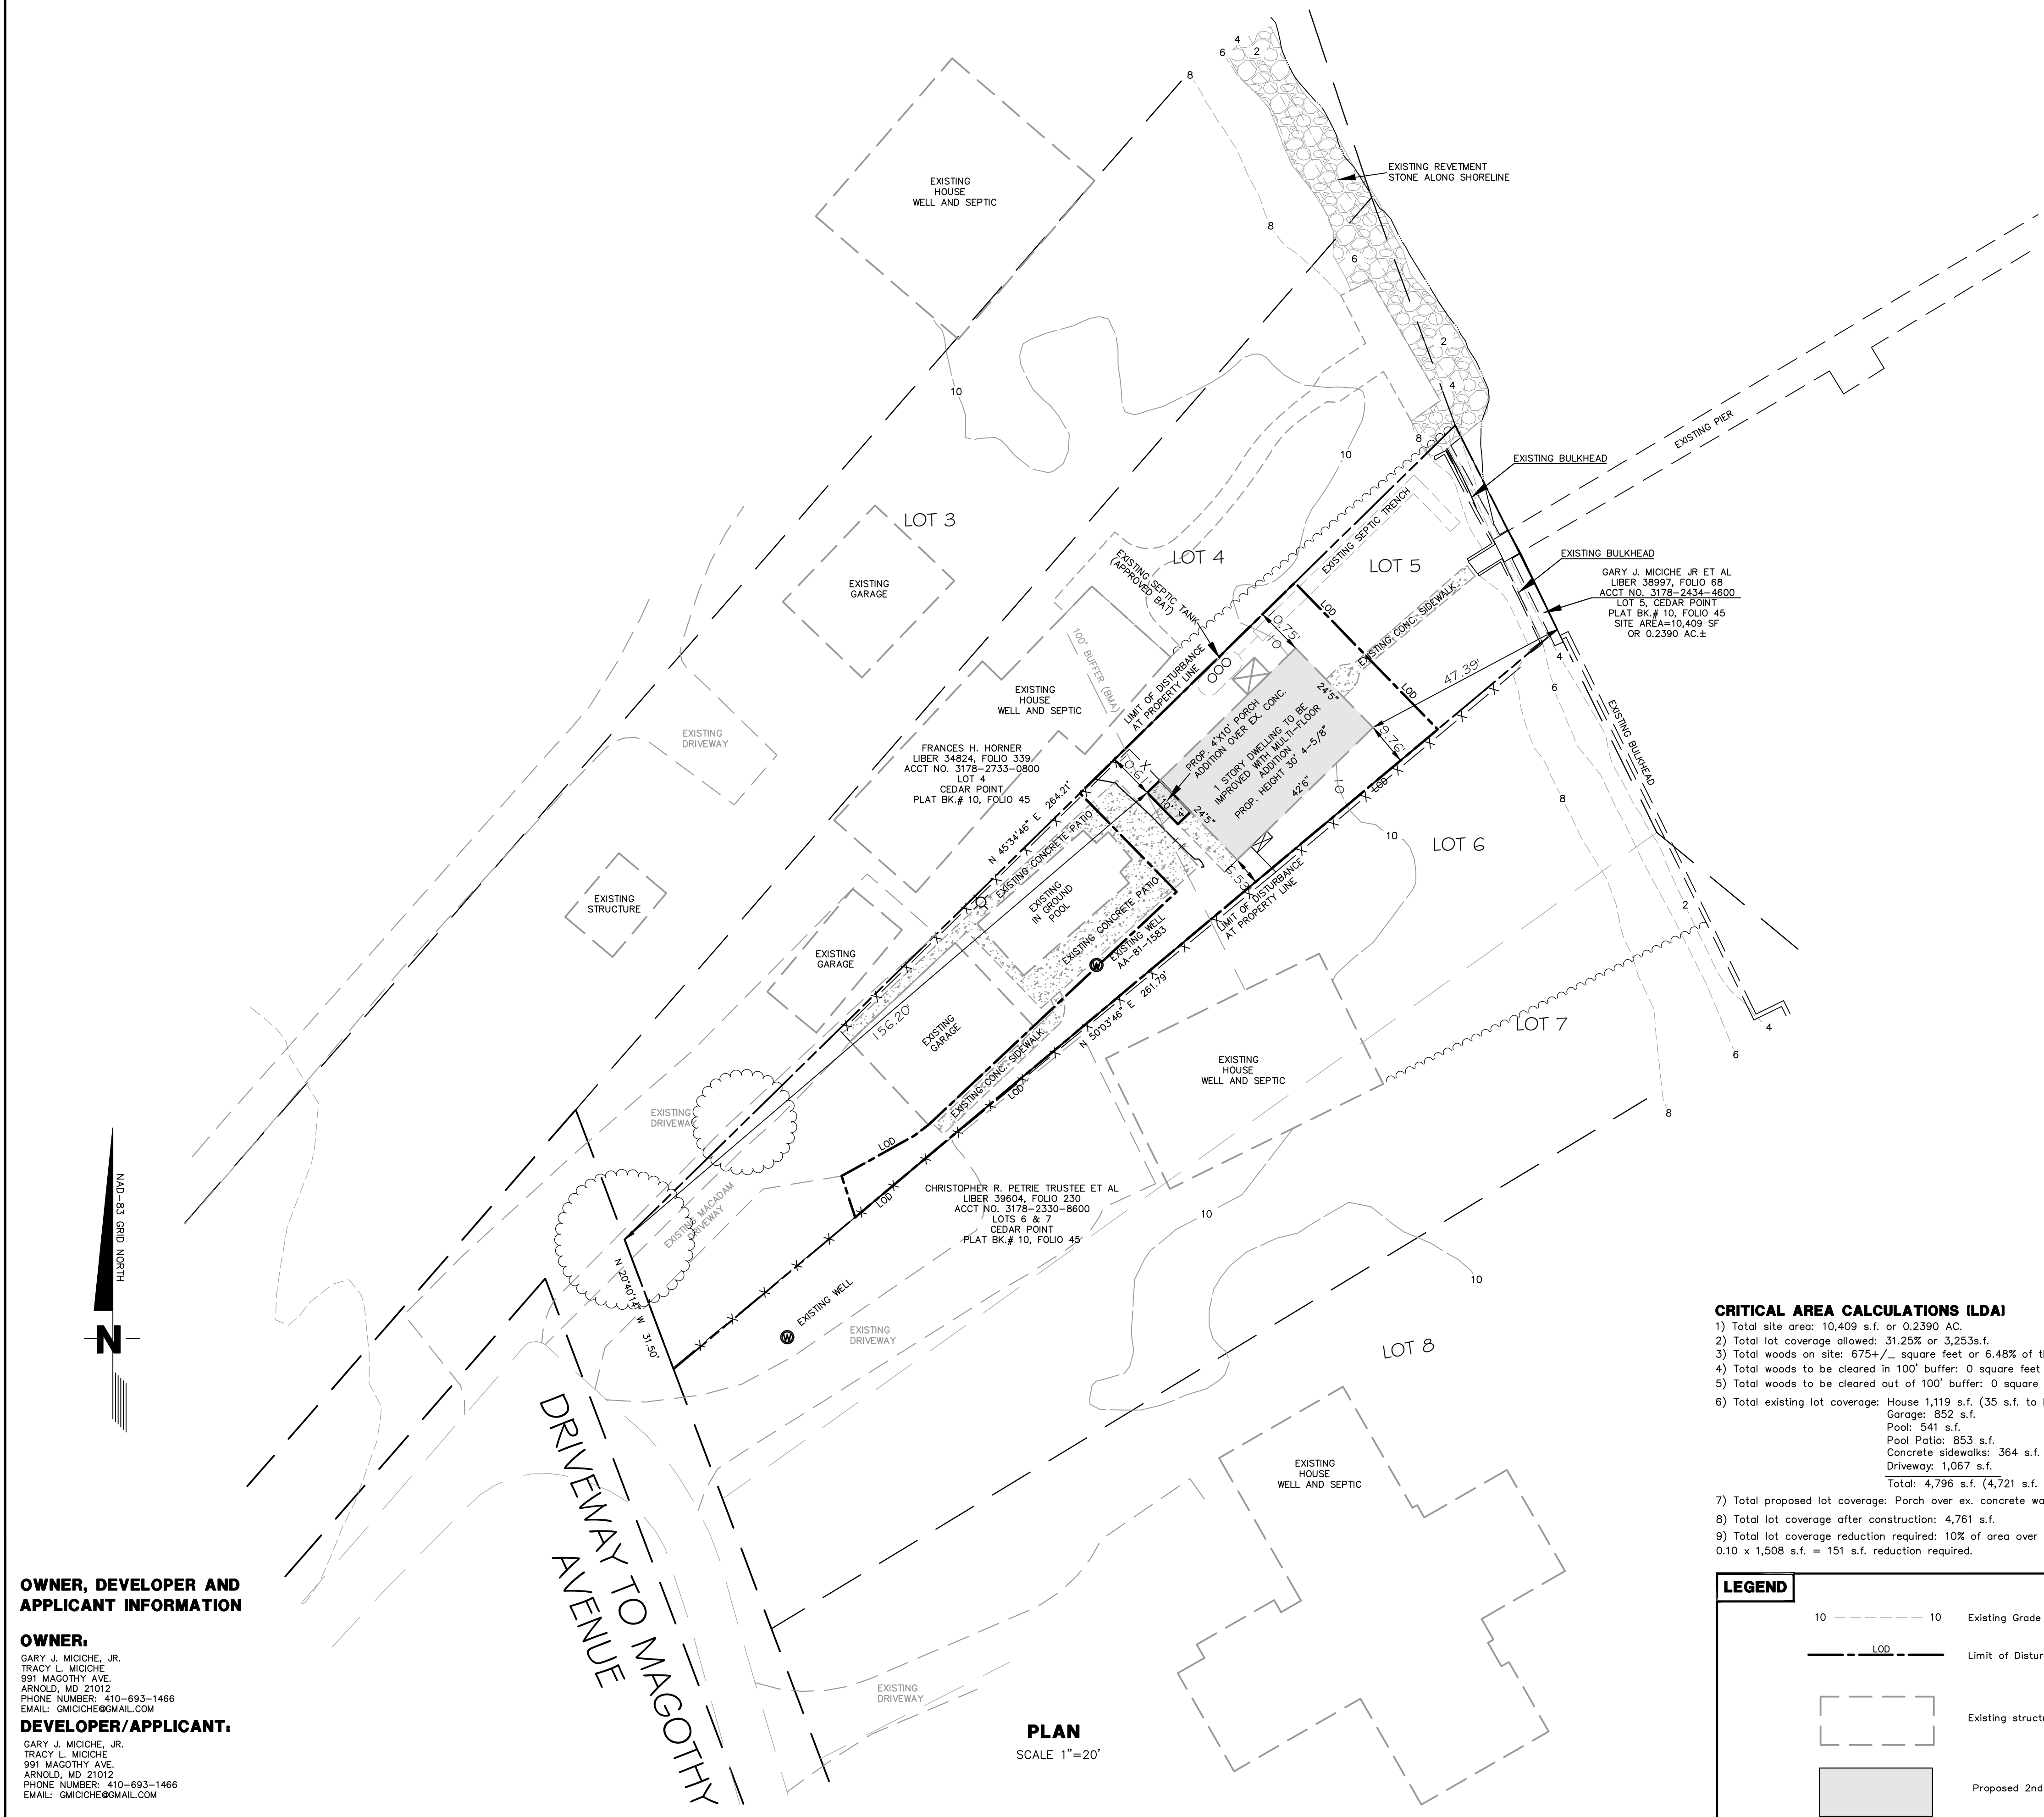

If the variance is granted, it should be conditioned on the applicant demonstrating during permitting that they are in compliance with § 17-8-403 regarding the 10% reduction.

DISCLAIMER: This recommendation does not constitute a building permit. In order for the applicant(s) to construct the structure(s) as proposed, the applicant(s) shall apply for and obtain the necessary building permits and obtain any other approvals required to perform the work described herein. This includes but is not limited to verifying the legal status of the lot, resolving adequacy of public facilities, and demonstrating compliance with environmental site design criteria.

RE: Cerdar Point, Lot 5, 991 Magothy Ave. Arnold MD 21012

Dear Planner:

Please accept this submittal of a critical area and zoning variance for the above referenced project. We are proposing the construction of a single-family dwelling addition on the above referenced lot. The proposed multi floor addition over the existing first floor within the existing house footprint. The addition will have a max height of 30' 4-5/8". The addition has an overall footprint of 42'6" x 24'5" and is setback 47.39' from the eastern front property line (Magothy River), 156.20' from the western rear property line (Magothy Ave.), 10.61' from the northern side property line, and 6.53' from the southern side property line. This proposal will require a zoning variance of 1' to allow the dwelling addition to be constructed as close as 6' to the side lot line. We will need a variance to allow construction that is not relatively in line with the approximate average front setback.

Please note this is a R2 zoned property and therefore required to meet the setbacks as required in 18-4-601 of the County Code. For a principal structure, this section of the County Code requires a front setback of 30', a side setback of 7', and a rear setback of 25'. We are proposing a new dwelling addition (2nd and 3rd floors) that are setback 6' from the side property line, therefore necessitating a 1' zoning variance.

Please note that location of a principal structure on a waterfront lot is based on an approximate average of the location of principal structures on abutting lots intended to keep structures relatively in line with one another. We are proposing to construct the proposed multi-floor addition over the existing first floor within the existing house footprint. This addition lies closer to the shoreline than the approximate average (83.20', therefore necessitating a variance of 35.81'.

Profile Comments:

Critical Area Team: No objections.

Our response: N/A

Zoning Administration Section: Revise the Administrative Site Plan to reflect the proposed multi-floor addition, rather than a 2nd story addition.

Correct the Code reference in the Letter of Explanation for setbacks in the R2, 18-4-601 rather than 18-4-701.

The applicants are reminded that, in order for the Administrative Hearing Officer to grant approval of the variances, the proposal must address and meet all of the applicable variance standards provided under Section 18-16-305. The Letter of Explanation should address each of those standards and provide adequate justification for each of the variances required.

Our response: The site plan and letter of explanation have been revised as required. The letter of explanation addresses the standards of Section 18-16-305.

We feel this zoning variance request meets the requirements of Article 18-16-305 (a) & (c) and therefore the variances should be granted. Below is the justification for granting the above noted variances.

18-16-305(a)(1) Because of certain unique physical conditions, such as irregularity, narrowness or shallowness of lot size and shape or exceptional topographical conditions peculiar to and inherent in the particular lot, there is no reasonable possibility of developing the lot in strict conformance with this article; or:

This site is an existing, legally platted, R2 lot. This lot was recorded in 1937, prior to the implementation of any critical area laws. The lot is developed with a single-family dwelling and other site improvements. The existing house is located at 47.39' to the water's edge and as close as 6.53' to the side property line. This restricts the owner's ability to construct the addition without being closer than the approximate average and closer to the side property line without the need for a variance. With the size of the site, and the location of the existing house, there is no way of building the proposed addition without the need for these variances. These are the unique characteristics of the lot.

18-16-305(a)(2) Because of exceptional circumstances other than financial considerations, the grant of a variance is necessary to avoid practical difficulties or unnecessary hardship and to enable the applicant to develop the lot:

With the unique characteristics of this site, we are not able to develop the property without the need for these variances. With the location of the existing house, there is no way of building the proposed addition without the need for these variances. We feel the owner should have the right to construct the additional floor area over the existing first floor of the dwelling, and that this request is the minimum variance to avoid practical difficulties or unnecessary hardships.

18-16-305(b) (1) Because of certain unique physical conditions, such as exceptional topographical conditions peculiar to and inherent in the particular lot or irregularity, narrowness, or shallowness of lot size and shape, strict implementation of the County's critical area program or bog protection program would result in an unwarranted hardship, as that term is defined in the Natural Resources Article, § 8-1808, of the State Code, to the applicant;

This site is an existing, legally platted, R2 lot. This lot was recorded in 1937, prior to the implementation of any critical area laws. The lot is developed with a single-family dwelling and other site improvements. The existing house is located at 47.39' to the water's edge and as close as 6.53' to the side property line. This restricts the owner's ability to construct the addition without being closer than the approximate average and closer to the side property line without the need for a variance. With the size of the site, and the location of the existing house, there is no way of building the proposed addition without the need for these variances. These are the unique characteristics of the lot. These are the unique characteristics of the lot.

18-16-305(b) (2) (i) A literal interpretation of COMAR, Title 27, Criteria for Local Critical Area Program Development or the County's critical area program and related ordinances will deprive the applicant of rights commonly enjoyed by other properties in similar areas as permitted in accordance with the provisions of the critical area program within the critical area of the County; or

The applicant would not be able to improve their property if this variance is not approved. The applicant should have the right to build within the existing footprint of the house.

18-16-305(b) (ii) The County's bog protection program will deprive the applicant of rights commonly enjoyed by other properties in similar areas within the bog protection area of the County;

This property is not within the County's bog protection area.

18-16-305(b) (3) The granting of a variance will not confer on an applicant any special privilege that would be denied by COMAR, Title 27, the County's critical area program to other lands or structures within the County critical area, or the County's bog protection program to other lands or structures within a bog protection area;

This proposal is within the existing footprint of the house. The granting of a variance will not confer on an applicant any special privilege that would be denied by COMAR, Title 27, the County's critical area program to other lands or structures within the County critical area.

18-16-305(b) (4) The variance request is not based on conditions or circumstances that are the result of actions by the applicant, including the commencement of development before an application for a variance was filed, and does not arise from any condition relating to land or building use on any neighboring property;

The existing first floor walls will be used for this proposal. The house was constructed in 1940. This variance request is not based on conditions or circumstances that are the result of actions by the applicant, including the commencement of development before an application for a variance was filed, and does not arise from any condition relating to land or building use on any neighboring property.

18-16-305(b) (5) The granting of a variance will not adversely affect water quality or adversely impact fish, wildlife, or plant habitat within the County's critical area or a bog protection area and will be in harmony with the general spirit and intent of the County's critical area program or bog protection program;

This proposal will not increase the total site lot coverage. The granting of a variance will not adversely affect water quality or adversely impact fish, wildlife, or plant habitat within the County's critical area or a bog protection area and will be in harmony with the general spirit and intent of the County's critical area program or bog protection program.

18-16-305(b) (6) The applicant for a variance to allow development in the 100-foot upland buffer has maximized the distance between the bog and each structure, taking into account natural features and the replacement of utilities, and has met the requirements of § 17-9-208 of this Code;

This site is not within a bog protection area.

18-16-305(b) (7) The applicant, by competent and substantial evidence, has overcome the presumption contained in the Natural Resources Article, § 8-1808, of the State Code; and

We feel that the applicant, by competent and substantial evidence, has overcome the presumption contained in the Natural Resources Article, § 8-1808, of the State Code.

18-16-305(b) (8) The applicant has evaluated and implemented site planning alternatives in accordance with § 18-16-201(c).

The applicant is proposing to build this addition within the existing footprint to eliminate site grading. Any site planning alternatives would increase the site disturbance.

18-16-305(c)(1): the variance is the minimum variance necessary to afford relief:

This variance is the minimum variance necessary to afford relief in that the proposed dwelling addition will be constructed within the existing footprint utilizing the walls of the existing house, therefore only having a minimum impact to average front setback and only a 1' encroachment into the side lot line setback. We feel this request is the minimum variance necessary to afford relief.

18-16-305(c)(2) the granting of the variance will not:

(i) alter the essential character of the neighborhood or district in which the lot is located:

The approval of these variances will not alter the essential character of the neighborhood. The house is in keeping with other homes in the neighborhood.

(ii) substantially impair the appropriate use or development of adjacent property:

This proposed development would not impair the appropriate use or development of adjacent properties. The neighboring properties are currently developed with a single-family dwelling. This proposal does not have an impact on these dwellings nor the ability of the owner to improve or further develop their property.

(iii) reduce forest cover in the limited development and resource conservation areas of the critical area:

The proposed development will not decrease forest cover within Chesapeake Bay Critical Area. There is no clearing required for this improvement.

(iv) be contrary to acceptable clearing and replanting practices required for development in the critical area or a bog protection area:

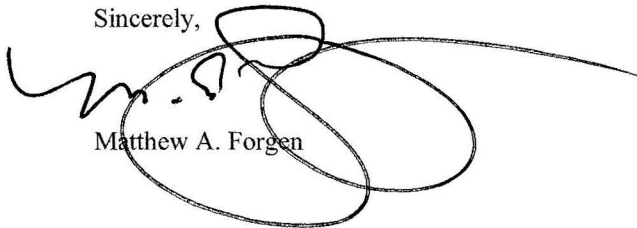

The property is not located within a bog protection area and is not contrary to acceptable clearing and replanting practices required for development in the critical area or a bog protection area.

(v) be detrimental to the public welfare:

This development is not detrimental to the health and welfare of the community. This proposal does not increase the total lot coverage and does not create additional site runoff.

If you should have any questions regarding this submittal, please feel free to contact me at the number above.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. A. Forgen', with a large, looping flourish extending to the right.

CRITICAL AREA REPORT

PREPARED BY:
M.A.F. & ASSOCIATES, LLC
55 Jones Station Road, W.
Severna Park, MD 21146

443-864-8589

August 13, 2024

INTRODUCTION

The lot is located at 991 Magothy Avenue, Arnold MD 21012. This is a legal lot as defined by Article 17-1-101 (63). The property owner is proposing a 2-story addition over the existing single-family dwelling that lies partially within the side yard setback and within the average front setback within a R2 zoning district. The lot is an undersized lot for an R2 zoning district and is waterfront. This lot lies entirely within the LDA portion of the Chesapeake Bay Critical Area.

VICINITY MAP

Included in this report and shown on the attached plan is a vicinity map designating the location of the subject site. Also included in the report is a portion of the Critical Area Map with the site located.

NARRATIVE

EXISTING CONDITIONS

The lot is currently an improved single-family dwelling lot. The lot is an undersized R2 zoned lot. The lot is improved with a single-family dwelling, detached garage and an inground swimming pool. The property slopes from the road to the waters edge. The slope is approximately 3%+/- to the water side of the property.

There was no wildlife seen around the property at the time of inspection. It is expected that there is very little to no wildlife use of the property since it is fully developed.

PROPOSED DEVELOPMENT

The property owner is proposing a 2-story addition over the existing single-family dwelling that lies partially within the side yard setback and within the average front setback within a R2 zoning district.

STORMWATER MANAGEMENT

During construction, sediment and erosion control measures will be employed. Storm water management will not be required for this application.

IMPACT MINIMIZATION

Due to the unique lot characteristics and the location of the existing dwelling, we feel that this development plan demonstrates a minimal impact on the environment.

HABITAT PROTECTION AREAS

The habitat protection area on this property is the 100' buffer to tidal waters.

AFTER CONSTRUCTION CONDITIONS AND SITE CALCULATIONS

The proposed conditions of the site include the construction of a new house and driveway. The site calculations are as follows:

Total site area	10,409 sf
Existing woodland	675 sf
Proposed clearing	0 sf
Proposed planting	to be determined.
Existing impervious coverage prior to the proposed lot coverage	4,796 sf
Allowed lot coverage	4,796 sf (grandfathered)
Proposed lot coverage	40 sf
Proposed lot coverage reduction	151 sf
Existing and proposed lot coverage	4,605 sf

CONCLUSIONS

The lot in question is an undersized legal lot located in an established community. It's not possible to construct the proposed dwelling addition without the need for the requested variances based on the location of the existing dwelling.

As proposed, the development of the lot does not have an adverse impact on the plant or wildlife habitat of the Critical Area. The proposed dwelling addition and site improvements will not adversely impact adjacent properties.

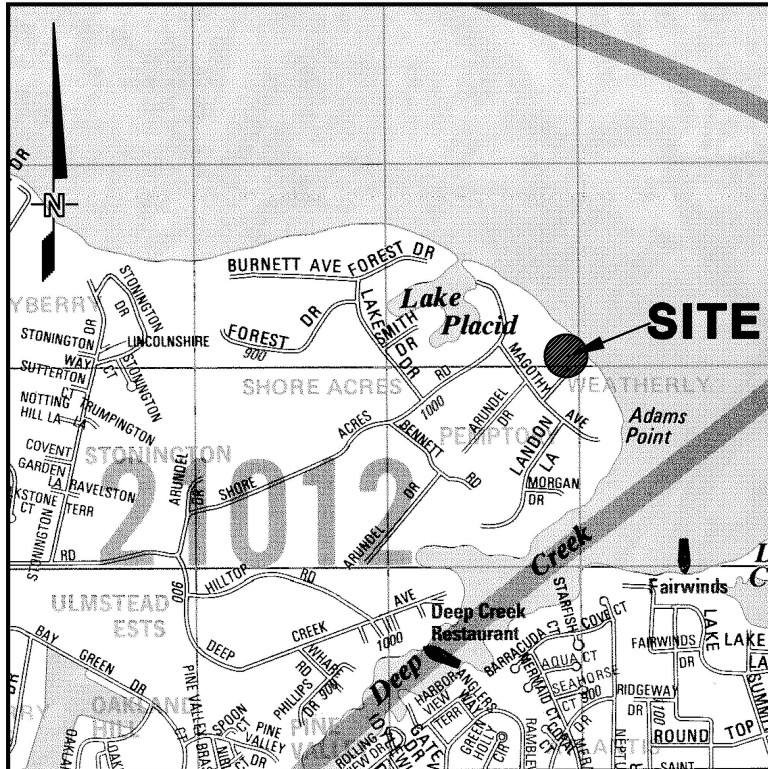

PLANS

A plan showing the site, and its improvements is attached to this report.

ADDITIONAL INFORMATION

A Notification of Project Application for the Critical Area Commission is included in this package.

RE: Gary Miciche
991 Magothy Ave.
Arnold, MD 21012

NUMBER: 2024-0167-V

SUBJECT: Variance/Special Exception/Rezoning

The Health Department has reviewed the above referenced variance to allow a dwelling addition with less setbacks than required and that does not comply with the designated location of a principal structure on a waterfront lot.

The Health Department does not have an approved plan for this project. The Health Department has no objection to the above referenced variance request as long as a plan is submitted and approved by the Health Department. Please revise the site plan for the Perc Application PAT02050567.

If you have further questions or comments, please contact Brian Chew at 410-222-7413.
